Summary of Product Characteristics (SMPC)

NAME OF THE MEDICINAL PRODUCT

Noorivax Tablet

2. **QUALITATIVE AND QUANTITATIVE:** Omega 3 (50 mg),

PHARMACEUTICAL FORM: Tablet

CLINICAL PARTICULARS :

Omega-3 fatty acids have many potential benefits for your cardiovascular health. One key benefit is that they help lower your triglyceride levels. Too many triglycerides in your blood (hypertriglyceridemia) raises your risk of atherosclerosis, and through this, can increase your risk of heart disease and stroke. So, it's important to keep triglyceride levels under control. In addition, omega-3s may help you by raising your HDL (good) cholesterol and lowering your blood pressure.

Choline : This is found naturally in a wide range of foods in the free and esterified form is also available directly from the diet. It helps to improve cognitive and neurological function in offspring.

Inositol : Combining omega-3 fatty acids with inositol reduced symptoms of mania and depression in children aged 5–12 years.

Posology and method of administration: 1 or 2 tablets to be chewed daily.

4. **Contraindications:** Hypersensitivity to any of the active ingredients or excipients

5. **Special warnings and precautions:** Before taking this product, tell your doctor or pharmacist if you are allergic to any of its ingredients; or if you have any other allergies. This product may contain inactive ingredients, which can cause allergic reactions or other problems.

5.1 Interaction with other medicinal products and other forms of interaction with Antibiotics:

Drug interactions may change how your medications work or increase your risk for serious side effects. This document does not contain all possible drug interactions. Keep a list of all the products you use (including prescription/nonprescription drugs and herbal products) and share it with your doctor
