Calcium (from di calcium phosphate)	75.0 mg
Phosphorus (from di calcium phosphorus)	58.0 mg

For the full list of the excipients, see section 6.1.

## 3. Pharmaceutical form

Softgel capsule.

Brownish, soft gelatin capsule.

## 4. Clinical particulars

### 4.1 Therapeutic indications

Envite Super capsule is indicated for:

- Prevention and treatment of vitamin deficiencies.
- Enhancement of immune function.
- Improvement of general well-being.

### 4.2 Posology and method of administration

Adults: One capsule daily, preferably with meals.

Children: As directed by a healthcare professional.

Method of administration: Oral

### **4.3 Contraindications**

- Hypersensitivity to any of the components.
- Hypervitaminosis A or D.
- Severe renal impairment.

### **4.4 Special warnings and precautions for use**

- Do not exceed the recommended dosage. Keep out of the reach of children.
- Multivitamins are not recommended for the treatment of severe specific vitamins and minerals deficiencies.
- Use with caution in patients with liver or kidney disease.
- Consult a healthcare professional before use during pregnancy or lactation.

### **4.5 Interaction with other medicinal products and other forms of interaction**

- Alcohol consumption may impair absorption and metabolism of several B-complex vitamins and reduce the efficacy of supplementation.
- Retinoids: Concomitant use may lead to additive toxicity and increase the risk of hypervitaminosis A.
- Bile acid sequestrants: May impair absorption of fat-soluble vitamins including vitamin A.

### **4.6 Fertility, pregnancy and lactation**

Use under medical supervision during pregnancy and lactation.

### **4.7 Effects on ability to drive and use machines**

No known effects.

### **4.8 Undesirable effects**

Rarely, gastrointestinal disturbances or allergic reactions may occur.

### **4.9 Overdose**

Symptoms depend on the specific vitamins involved. Management is symptomatic and supportive. Gastric lavage may be indicated in acute cases.

## **5. Pharmacological properties**

### **5.1 Pharmacodynamic properties**

Envite Super capsule provides essential vitamins that support metabolic functions, enhance immune response, and improve overall health.

### **5.2 Pharmacokinetic properties**

- **Absorption:** Most components are well absorbed in the gastrointestinal tract.
- **Distribution:** Widely distributed to tissues; some are stored in the liver.
- **Metabolism:** Fat-soluble vitamins are metabolized hepatically.
- **Excretion:** Primarily renal and fecal depending on solubility of components.

### **5.3 Preclinical safety data**

Not applicable.

## **6. Pharmaceutical particulars**

### **6.1 List of excipients**

**(FILL-IN LATER)**

### **6.2 Incompatibilities**

None known.

### **6.3 Shelf life**

2 years.

**(FILL-IN LATER)**

### **6.4 Special precautions for storage**

Store in a cool, dry place below 25°C. Keep out of reach of children.

### **6.5 Nature and contents of container**

Blister packs containing 30 softgel capsules.

**6.6 Special precautions for disposal**

No special requirements.

**7. Marketing authorisation holder**

Zolon Healthcare Limited.

9, Town Planning way,

Ilupeju Lagos.

**8. Marketing authorisation number(s)**

N/A

**9. Date of first authorisation / renewal of the authorisation**
